

A.O.S. HAS TAKEN ITS ROLE OF LEADERSHIP IN CONNECTED COPIERS TO THE NEXT LEVEL.

INTRODUCING OUR CONNECTED SOLUTIONS TEAM

PROVEN SUCCESS. A.O.S. introduced the digital concept to the Valley in 1996 and has proven success in Copy/Print applications with hundreds of local companies. This success has been achieved by backing up our sales professionals with a network specialist.

The advent of the SCAN application is radically changing the way our customers deal with hard copy documents. It requires more focus from A.O.S. so that our customers can take full advantage of this powerful feature. It necessitates that we work closely with your administrative staff. That's why we've added a desktop specialist and formed the A.O.S. Connected Solutions Team.

Once again, we are leading the Valley in providing a complete package for implementation and support in connected copier technology for your office.

CHRIS CONLEY, Network Professional

Chris Conley has been installing, maintaining and trouble-shooting computer networks for over 20 years. The quality of his work has produced a successful client base. He is proficient in dealing with a host of different servers, softwares, client platforms, business applications, Internet, and intranet applications. Chris has a proven track record working as a Senior Network Administrator and Engineer with private sector work including working with successful companies and organizations from Fresno to Los Angeles. Additionally, he has consulted the US Navy and holds various security clearances with the Department of Defense.

ANGELA LAKE, Desktop Specialist

Angela Lake is our Desktop Specialist. She will meet with your team and train them to use and fully implement your new Ricoh MFP. Her support will help to maximize your office efficiency as you learn how the Ricoh MFP Copier will support your unique office applications and document management requirements. Angela will also help provide a smooth and efficient transition at each employee's workstation to ensure your office benefits from the "low cost of operation" for network printing associated with day to day document printing.

She will help your organization take full advantage of the power of the MFP's scanning applications. Now you will be able to send your hardcopy documents by email, to others, to folder locations, and virtually anywhere in the world! She also will review any necessary Internet and computer fundamentals to successfully incorporate the new MFP onto your network environment.

After the installation, both our Network Professional and our Desktop Specialist can be available to support you and staff into the future. Most questions can be resolved with a simple phone call. Please use our skilled staff when necessary to make the most effective use of your MFP.

The Dependable Solution for
Digital Connected Copiers
